OZLintel Cut-End Protection

Care should be taken to avoid damaging this coating prior to installation. However should the coating be damaged it may be repaired by applying a stripe coat of Jotun Galvanite zinc-rich polyurethane primer or equivalent to a minimum 100 µm dry film thickness¹. Prior to reinstating the coating, any surface contamination including dirt², oil² or corrosion products³ should be removed by an appropriate method. Observe normal good painting practice with respect to weather and apply strictly in accordance with the paint manufacturer's recommendations⁴.

NOTES

- 1 The application should be in one to two coats to 100 µm applied by brush or roller application.
- 2 A rag wetted with acetone or methylated spirits is a suitable removal method for dirt and oil.
- 3 Suitable tools for removing corrosion products include: power wire brush, needle gun, disc sander, angle grinder or chipping hammer.
- 4 The temperature of the substrate should be at least 5°C and a minimum 3°C above the dew point of the air, temperature and relative humidity measured in the vicinity of the substrate.

Material Safety Data Sheet

Galvanite

1. Identification of the material and supplier

Product name : Galvanite
 Safety phrases : MRA0003823
 Supplier/Manufacturer : Jotun Australia
 8 Cawley Road
 Brooklyn 3012
 Australia
 Telephone + 61 39314 0722
 Fax + 61 39314 0423

Emergency telephone number : SDS/Jotun@jotun.no
 Area of application : Medical Emergencies 24 hours: Poisons Information Centre (Australia) 131 128
 Material uses : Industrial applications.
 : Solvent-borne.

2. Hazards identification

The preparation is classified in accordance with NHSC as follows:

Classification : R10
 Xn; R05
 P; R003

Risk phrases : R10. Flammable
 R05. Harmful. may cause lung damage if swallowed
 R003. Very toxic to aquatic organisms, may cause long term adverse effects in the aquatic environment.

Safety phrases : S23. Do not breathe vapour / spray
 S36. In case of insufficient ventilation, wear suitable respiratory equipment
 S61. Avoid release to the environment. Refer to special instructions/safety data sheet.

Statement of hazardous/dangerous nature : HAZARDOUS SUBSTANCE. DANGEROUS GOODS.

3. Composition information on ingredients

Mixture : Yes

| Ingredient name | CAS number | Concentration | Classification |
|---|------------|---------------|--|
| Zinc | 7440-66-2 | 50 - 100 | N; R50/53 |
| Naphtha (petroleum), hydrosulfurized heavy | 64742-82-1 | 2.5 - 10 | R10 |
| Zinc oxide | 1314-13-2 | 2.5 - 10 | N; R05 R06, R07 N; R01/53 N; R50/53 |
| Solvent naphtha (petroleum), light aromatic | 64742-85-6 | 0 - 1 | R10 N; R50/53 R06 N; R51/53 |
| 1,2,4-trimethylbenzene | 95-63-6 | 0 - 1 | R10 N; R50/53 N; R51/53 |
| Tetraacetic acid, 2-ethyl-, cobalt salt | 13568-82-8 | 0 - 1 | Xn; R03 Xi; R52/53/58 N; R51/53 Xn; R53 R03 N; R51/53 |

See section 16 for the full text of the R-phrases declared above

Other ingredients, determined not to be hazardous according to NHSC criteria, and not dangerous according to the ADG Code, make up the product concentration to 100%.

Date of issue : 17-11-2009. Page: 1/7
