The Low Maintenance

## STEEL VERANDAH POST

### **We didn't invent the verandah post...**

#### **we just perfected it.**

Sometimes we take for granted the way we do things. Like using timber for verandah posts in our homes and buildings. Now there is a much better way!

DuraGal<sup>®</sup> Post is a high tensile, lightweight steel post that is easy to install and requires very low maintenance.

Unlike timber, it will not leach sap, bow or rot and there are no knot holes and, of course, termites are not a problem.

DuraGal<sup>®</sup> Post features the famous patented DuraGal<sup>®</sup> In-line, Hot-dip Galvanized exterior protective coating, plus an internally painted surface finish. This means you get an internally & externally protected product with a smooth and attractive surface finish, that's delivered ready for painting or powder coating.

DuraGal<sup>®</sup> Post has a hot-dipped galvanized external surface with a typical coating thickness of 100g/m<sup>2</sup>. Unpainted DuraGal<sup>®</sup> is suitable for use in non-aggressive environments. For further information refer to the "DuraGal<sup>®</sup> Easy Painting and Corrosion Protection Guide".

### **Simple to Install**

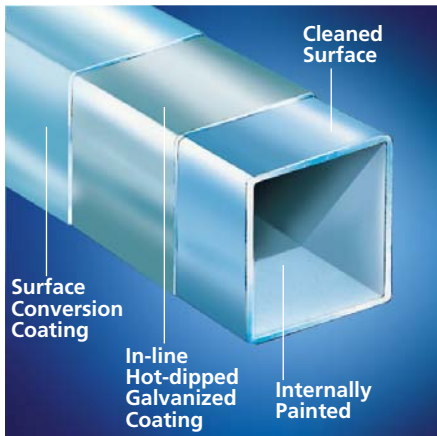

Installation is easy, with a standard top connection and an adjustable stirrup at the bottom, your post supplier has a choice of decorative post skirts. DuraGal<sup>®</sup> Post is available in a range of standard lengths, alternatively custom lengths can be arranged. In addition plain end or notched end posts are available. Check with the post supplier in your area. (A series of Fact Sheets are available detailing the installation process for a range of typical applications. Contact OneSteel Direct or your DuraGal<sup>®</sup> Post supplier for your copy.)

### **Innovative solutions**

You can buy DuraGal<sup>®</sup> Post with confidence knowing it is backed by OneSteel Market Mills, the leading manufacturer of high-tensile steel tubular verandah posts in Australia.

This means in a world where to stay in the game, you have to be a pacesetter, you can always be sure OneSteel Market Mills products will provide - Innovative Solutions.

## DuraGal Post Protection System

Another

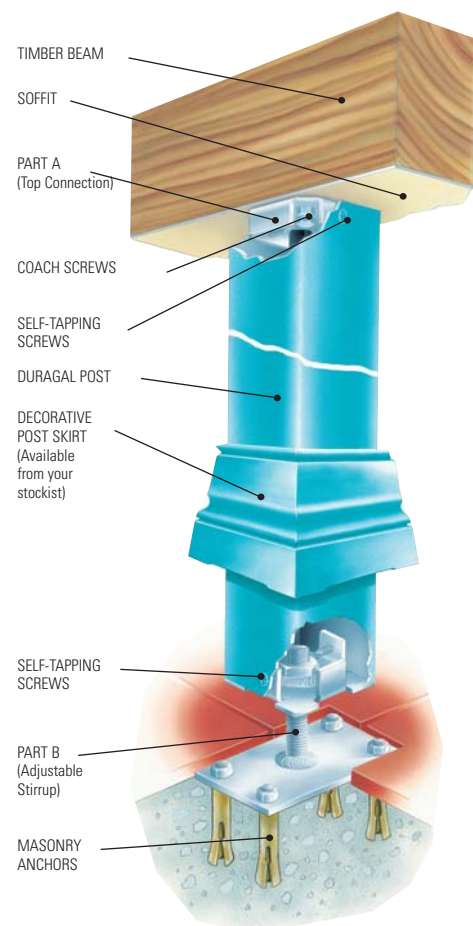

Product

Today, more than ever the benefits of being 'LeadSafe'® are becoming known. The external coating on the DuraGal Post is greater than 99.97% pure Zinc.

## 10 DuraGal Post Benefits

1. High tensile, stronger and lighter.
2. DuraGal® complies with the requirements of AS 1163 Grade C450L0.
3. Corrosion resistant, in-line, hot-dip, galvanized external coating and internally painted.
4. Uniform in-line galvanized coating - no weldline repair.
5. Pre-finished surface means that it is ready to use.
6. Easy to cut, weld, drill, paint or powder coat.
7. Cost savings - practically eliminates the costs incurred by shot-blasting, cleaning & painting after fabrication.
8. Consistent quality and dimensional tolerances.
9. Will not splinter, warp or leach sap.
10. Termite proof.
